

Isaac Hernandez

AI Engineer/ ML Engineer

AI Engineer widely experienced in AI Engineering and SWE. Looking for opportunities to push my skills and help the growth of the companies through data driven solutions collaborating with cross-functional teams. Graduated with a Bachelor's degree in mathematics with strong background in machine learning, programming and software engineering.

LANGUAGES

- English (C1) Full professional proficiency
- Spanish (Native)

HARD SKILLS

- Python (Tensorflow [Certified Developer],Pandas, PySpark, Sklearn, PyTorch, Matplotlib, Geopandas, Plotly, Flask, FastAPI, MLFlow, Pytest)
- Scala (base language, Spark)
- SQL DB's, No-SQL DB (PostgreSQL, MySQL, MongoDB)
- Spark, Hadoop, Kafka, Hive (Big Data)
- AWS (S3, Dynamo, RDS, Step Functions, SageMaker, Athena, Glue, EC2, ECS, Redshift, Lambda)

WORK EXPERIENCE

Staff AI Engineer

[VerveMarket](#) | June 2025 - Today

Leading, implementing architecting and owning AI/Data projects.

- AI Assisted hybrid search engine
- AI Assisted taxonomy product classification
- Language models fine-tune for NER.
- AI/Data infrastructure
- Data pipelines for analytics and inference

Working back to back with the CTO on the data engineering projects.

Lead AI Engineer

[Contpaqi](#) | September 2025 - February 2026

Leading agentic solutions for accounting services like generating invoices, and tax status certificates, compliance, etc.

Lead Researcher and Development

[Softserve](#) | July 2025 - November 2025

-
I led the MVP development of an agentic platform for healthcare services, like automating the form filling of medical templates through OCR and STT services

Lead AI Engineer

[Telepatia AI](#) | June 2025 - July 2025

I led the MVP development for an hallucination and missing information detector for an AI assisted medical form filling from a transcribed medical appointment (STT)

WORK EXPERIENCE

Senior Machine Learning Engineer

Nubank | January 2024 - May 2025

Top LATAM Fintech.

End to end deployment of real time and batch risk (underwriting) models: data integration and prep, training, packaging, integration and monitoring as a microservice on a K8s cluster.
Developed a data integrity framework on Scala to monitor sudden data changes on business metrics datasets.

Senior Data Engineer

Citigroup | July 2023 - January 2024

US based largest financial company in the world.

Core contributor and technical lead migrating and standardizing peta-byte scale on-premise Data Lake to a cloud Data Lake house (S3, Snowflake), deploying Spark jobs in EKS cluster performing batch ingestion and transformations.(dozens of TB on daily basis)

AI Engineer Consultant (Freelance)

FundamentlPartners | June 2023 - October 2023

End to end development of Generative QA and summarization product, indexing private data into Vector DB and using an LLM to generate answers using the knowledge base .

AI Engineer Consultant (Freelance)

Botco AI | April 2023 - Today

US Based Tech startup working with international team.

Core contributor to web scrapping microservice (Python) deployed as application in Kubernetes EKS cluster.

Core contributor to document (HTML, PDF, Docx) indexer API (Python FastAPI) as a microservice deployed in EKS cluster to store indexed docs into Vector DB (PostgreSQL) to be used as knowledge base for Generative QA.

Fine-tune transformers and LLM models (GPT and LLama) for QA and doc summarization tasks.

- GitHub/GitLab/BitBucket (CI/CD)
- GCP (BigQuery, AppEngine, VertexAI, Dataflow, GKE, DataProc)
- Azure (AZ-900 Cert). Azure Data Factory, Synapse Analytics, Databricks
- Snowflake
- Tableau, Google Data Studio, Grafana, ElasticStack
- Docker, Kubernetes
- Airflow, dbt Cloud
- Bash Programming
- API REST, GraphQL
- Data Lake and Data Warehousing
- Data Modelling
- Data Quality
- Data Governance and Security

Senior Machine Learning Engineer
BBVA | January 2023 - July 2023
Largest bank in Mexico

Technical lead and core contributor architecting, developing and deploying to production community detection and graph similarity models to prevent money laundering and frauds, through well-documented, scalable and reusable PySpark code.

ETL Pipelines development generating datasets for analytics with Big Data tools (Pyspark, Hadoop, Kafka, Hive)

Monitoring, evaluation and retraining of ML models.

Data Scientist

Cargamos | November 2021 - November 2022

Tech/Logistics Startup based in Mexico. Ranked in Top 10 Startups LinkedIn

Design (architect), build, deploy, maintenance and evaluation of real-time anomaly detection algorithm (Isolation forest) in GCP to prevent frauds and thefts.

Support, monitoring and evaluation of stop detection algorithm and Deep Convolutional Neural Network model to automate delivery evidence image classification.

ETL/ ELT Pipelines development with PySpark, Data warehouse design and build improving and guaranteeing the data availability to all the teams within the company leading into self-service analytics

Analytics manager supporting finance and operations teams, performing data analysis and building scalable applications in order to monitor real-time operations and give insights about the business KPI's to the stakeholders, turning about 80% into 97% of operational success and reporting revenue to the investors

CERTIFICATIONS AND SPECIALIZATIONS

- TensorFlow Developer Certificate
- MLOps | Machine Learning Operations Specialization
- Deep learning specialization.
- Data Scientist with Python.
- Data Analyst With Python.
- Microsoft Certified AZ-900
- Natural Language Processing Specialization (WIP)

SOFT SKILLS

- Data driven strategies
- Stakeholder management
- Product sense
- Storytelling
- Business intelligence
- Problem solving and critical thinking
- Agile Methodologies and goal-oriented
- Adaptability
- Fast learning
- Initiative and proactive
- Responsibility and team-oriented work
- Innovative

EDUCATION

Bachelor of Mathematics, National Autonomous University of Mexico (UNAM)

August 2017 - August 2021

GPA: 92/100

ADDITIONAL INFORMATION

NLP Research Intern

(March 2022 - January 2023)

Institute for Research in Applied Mathematics and Systems (IIMAS, UNAM).

- Data collection from newspaper sources through search engines scrapping
- Reinforcement and Deep Learning algorithm design, build and implementation using PyTorch, Baselines (OpenAI) and Dopamine
- Evaluate the model's results and accuracy

Data Science Intern

(Oct 2021)

Institute of Mathematics, UNAM

- As a participant I contributed to the companies to implement data driven strategies .

Research summer residency

(2020)

Research Center in Mathematics(CIMAT).

- As a participant, I had an approach to advanced research topics in multiple fields of mathematics.

Advanced Analysis Problem Solving Workshop

(Ago 2019)

Research Center in Mathematics(CIMAT).

- Short research stay at the CIMAT's headquarters based in Guanajuato.
